ADMINISTERING MICROSOFT EXCHANGE SERVER 2016

Duration: 2 days

About this course

This 5-day instructor-led course teaches IT professionals how to administer and support Exchange Server 2016. Students will learn how to install Exchange Server 2016, and how to configure and manage an Exchange Server environment. The course covers how to manage mail recipients and public folders, including how to perform bulk operations using Exchange Management Shell. Students also will learn how to manage client connectivity, message transport and hygiene, how to implement and manage highly available Exchange Server deployments, and how to implement back up and disaster recovery solutions.

The course also teaches students how to maintain and monitor an Exchange Server 2016 deployment. In addition, students will learn how to administer Exchange Online in an Office 365 deployment.

Audience and Prerequisites

The audience for this course is IT Professionals, before attending this course, students must have:

- A minimum two years of experience administering Windows Server, including Windows Server 2012 R2 or Windows Server 2016.
- A minimum two years' experience working with active Directory Domain Services (AD DS). A minimum two years of experience working with name resolution including Domain Name System (DNS).
- Understanding of TCP/IP and networking concepts.
- Understanding of Windows Server 2012 R2 or later, and AD DS, including planning, designing, and deploying.
- Understanding of security concepts such as authentication and authorization.
- Understanding of Simple Mail Transfer Protocol (SMTP).
- Working knowledge of public key infrastructure (PKI) technologies, including Active Directory Certificate Services (AD CS).

Audience Profile

This course is primarily intended for people aspiring to become enterprise-level messaging administrators for Exchange Server 2016. IT generalists and help-desk professionals who want to learn about Exchange Server 2016 might also take this course. Students taking this course are expected to have at least two years of experience working in the IT field—typically in the areas of Windows Server administration, network administration, help desk, or system administration. They are not expected to have experience with previous Exchange Server versions.

The secondary audience for this course includes IT professionals who take this course as preparation material for exam 70-345: Designing and Deploying Microsoft Exchange Server 2016, or as part of the requirement for the MCSE: Microsoft Exchange Server 2016 certification.

At Course Completion

After completing this course, students will be able to:

- Perform deployment and basic management of Exchange Server 2016.
- Manage Exchange Server 2016.
- Create and manage various recipient objects in Exchange Server 2016.

- Use Exchange Management Shell to create and manage various recipient objects in Exchange Server 2016, and perform various tasks to automate Exchange management procedures.
- Configure client connectivity to Exchange Server 2016, and manage Client Access services.
- Implement and manage high availability.
- Implement backup and disaster recovery for Exchange Server 2016.
- Configure message transport options.
- Configure message hygiene and security options.
- Implement and manage Exchange Online deployments.
- Monitor and troubleshoot Exchange Server 2016.
- Secure and maintain Exchange Server 2016.

Course Overview

Module 1- Deploying Microsoft Exchange Server 2016

This module describes the key features and enhancements in Exchange Server 2016. The module also describes the deployment requirements and options for implementing Exchange Server 2016.

Lessons

- Overview of Exchange Server 2016
- Requirements and deployment options for Exchange Server 2016

Lab : Deploying Microsoft Exchange Server 2016

- Evaluating requirements and prerequisites for an Exchange Server 2016 installation
- Deploying Exchange Server 2016

Module 2- Managing Microsoft Exchange Server 2016 Servers

This module describes the built-in management tools that you can use to manage maintain and maintain Exchange Server 2016. The module also explains the features and functionality of a Mailbox server role and procedures for configuring a Mailbox server.

Lessons

- Exchange Server 2016 management
- Overview of the Exchange 2016 Mailbox server
- Configuring Mailbox servers

Lab : Configuring Mailbox servers

- Creating and configuring mailbox databases

After completing this module, students will be able to:

- Describe Microsoft Exchange Server 2016 management.
- Describe the Exchange Server 2016 Mailbox server role.
- Configure mailbox servers

Module 3- Managing Recipient Objects

This module describes the types of recipient objects in Exchange Server 2016, and explains how to manage these objects. The module also describes how to manage address lists and policies on the Mailbox server role.

Lessons

- Exchange Server 2016 recipients
- Managing Exchange Server recipients
- Configuring address lists and policies

Lab : Managing Exchange Server recipients and public folders

- Managing recipients
- Managing public folder mailboxes

Lab : Managing Exchange Server email address lists and policies

- Managing email-address policies
- Managing address lists and address book policies

Module 4- Managing Microsoft Exchange Server 2016 and Recipient objects by using Exchange Management Shell

This module provides an overview of the Exchange Management Shell, and describes how to use it to manage Exchange Server 2016 configuration and recipient objects. Lessons

- Overview of the Exchange Management Shell
- Managing Exchange Server 2016 by using Exchange Management Shell

- Managing Exchange Server 2016 by using Exchange Management Shell scripts

Lab : Managing Exchange Server and recipient objects by using Exchange Management Shell

- Using Exchange Management Shell to manage recipients
- Using Exchange Management Shell to manage Exchange Server

Module 5- Implementing Client Connectivity

This module describes how to configure and manage Client Access Services in Exchange Server 2016. The module also explains the options for configuring client connectivity, Microsoft Outlook on the web, and mobile messaging.

Lessons

- Configuring client access services in Exchange Server 2016
- Managing client services
- Client connectivity and publishing of Exchange Server 2016 services
- Configuring Outlook on the web
- Configuring mobile messaging on Exchange Server 2016

Lab : Deploying and configuring client access services on Exchange Server 2016

- Configuring certificates for client access
- Configuring client access options
- Configuring custom MailTips

Lab : Deploying and configuring client access services on Exchange Server

- Configuring Exchange Server 2016 for Outlook
- Configuring Outlook on the web
- Configuring Microsoft Exchange ActiveSync

Module 6- Managing high availability in Exchange Server 2016

This module describes the high availability options built into Exchange Server 2016. The module also explains how to configure high availability for Mailbox databases and Client Access services.

Lessons

- High availability on Exchange Server 2016
- Configuring highly available mailbox databases
- Configuring high availability of Client Access services.

Lab : Implementing DAGs

- Creating and configuring a database availability group

Lab : Implementing and testing high availability

- Deploying a high availability solution for client access services
- Testing the high availability configuration

Module 7- Implementing Disaster Recovery for Microsoft Exchange Server 2016

This module describes the backup and recovery options in Exchange Server 2016 and explains the factors you must consider when you use these options.

Lessons

- Implementing Exchange Server 2016 backup
- Implementing Exchange Server 2016 recovery

Lab : Backing up Exchange Server 2016

- Backing up Exchange Server 2016

Lab : Implementing disaster recovery for Exchange Server 2016

- Restoring Exchange Server 2016 data
- Restore an Exchange Server DAG member (optional)

Module 8 – Configuring and Managing Message Transport

This module provides an overview of message transport, and describes how to configure message transport. The module also describes how to configure transport rules and DLP policies to manage message transport.

Lessons

- Overview of message transport
- Configuring message transport
- Managing transport rules

Lab : Configuring message transport

- Configuring message transport
- Troubleshooting message delivery
- Configuring a disclaimer transport rule
- Configuring a DLP policy for financial data

Module 9- Configuring Antivirus, Antispam, and Malware Protection

This module describes the key features and functionality of an Edge Transport server role in Exchange Server 2016. The module also explains how to configure message security by implementing an antivirus and antispam solution.

Lessons

- Deploying and managing an Edge Transport server for message security
- Implementing an antivirus solution for Exchange Server 2016
- Implementing an antispam solution for Exchange Server 2016

Lab : Configuring message security

- Configuring and testing EdgeSync
- Configuring antivirus, antispam, and malware protection features on Exchange Server 2016

Module 10- Implementing and Managing Microsoft Exchange Online Deployments

This module describes the key features of Exchange Online and Office 365. The module also describes how to manage and migrate to Exchange Online.

Lessons

- Overview of Exchange Online and Office 365
- Managing Exchange Online
- Implementing the migration to Exchange Online

Lab : Managing Exchange Online

- Managing Exchange Online

Module 11- Monitoring and Troubleshooting Microsoft Exchange Server 2016

This module describes how to monitor and troubleshoot Exchange Server 2016. The module explains how to collect and analyze performance data for various Exchange Server recipients and objects. The module also describes how to troubleshoot database issues, connectivity issues, and performance issues.

Lessons

- Monitoring Exchange Server 2016
- Troubleshooting Exchange Server 2016

Lab : Monitoring and troubleshooting Exchange Server 2016

- Monitoring Exchange Server
- Troubleshooting database availability
- Troubleshooting client access services

Module 12-Securing and Maintaining Exchange Server 2016

This module describes how to maintain and update an Exchange Server organization. The module explains how to plan and configure administrative security and administrative auditing in Exchange Server 2016.

Lessons

- Securing Exchange Server with role-based access control (RBAC)
- Configuring audit logging on Exchange Server 2016
- Maintaining Exchange Server 2016

Lab : Securing and maintaining Exchange Server 2016

- Configuring Exchange Server permissions
- Configuring audit logging
- Maintaining updates on Exchange Server 2016.

Your Complete User Adoption Solution for SharePoint and Office 365 from only 6p per user, per month

support 

Support+ is the instant Support and Helpdesk solution that works in unison with your essential business software to give your entire organisation comprehensive training and support on demand through 1,000's of help topics delivered in simple or detailed steps, videos and demonstrations.

training 

Training+ is a collection of premium training courses delivered in HD video format, on demand to everyone in your organisation. Users progress through each module, building on knowledge gained at every step, with real-world examples and comprehensive demonstrations all delivered with the friendly and down-to-earth style of an expert classroom Trainer.

CBT 

Created by the SharePoint experts at Combined Knowledge, CBT (Computer Based Training) helps your users become familiar with all key aspects of SharePoint from the comfort of their desks using a variety of effective delivery methods including hands-on exercises, illustrated examples and videos.
