

Nintex Workflow for Project Server 2010 – 1 day

Note: Nintex Workflow for Project Server 2010 is an add-on for Nintex Workflow 2010; this course is focused on Project Server 2010 and the Nintex Workflow for Project Server 2010 add-on.

To make full use of Nintex Workflow for Project Server you will also benefit from attending our 3 day Nintex Workflow 2010 course.

AM

The first half of your day is spent learning about Project Server 2010, although Project Server 2010 is based on SharePoint 2010 which many of you will already be familiar with it brings new components, techniques and terminology that are unique to Project Server. You spend your time getting to know the Project Server interface with attention to what is different from SharePoint 2010.

If you are already familiar with Project Server 2010 and know how to do things like create, Stages, Resources and Enterprise Project Types you will find the morning session easy but the knowledge from this session is essential to be able to use Nintex Workflow for Project Server.
